Product Description

Automatic 25 35 50 75 cumhr Wet Mix Batching Plant Low Cost Small Concrete Batching Plant Production Line
Bucket type Concrete Mixing Plant 50m³/h Concrete Batching Plant

One of the key advantages of the HZS50 model is its use of individual buckets for ingredient measurement. This ensures accurate proportions of cement, aggregate, water, and additives, resulting in consistent and high-quality concrete. The buckets are equipped with precise measurement systems, such as load cells or volumetric mechanisms, to ensure the exact amount of each ingredient is added to the mix.

The HZS50 bucket type concrete mixing plant incorporates a central mixing unit, which can be a stationary drum mixer, a twin-shaft mixer, or a planetary mixer. These mixers employ advanced technology to thoroughly blend the ingredients, ensuring a homogenous mixture with optimal strength and durability.
