Product Description

Fully Automatic 75m³/hour Small Portable Concrete Mixing Plant Ready Mix Mobile Concrete Batching Plant High Efficiency 75m³/h Stationary Concrete Batching Plant Concrete Mixing Plant

One of the key advantages of the HZS75 model is its use of individual buckets for ingredient measurement. This ensures accurate proportions of cement, aggregate, water, and additives, resulting in consistent and high-quality concrete. The buckets are equipped with precise measurement systems, such as load cells or volumetric mechanisms, to ensure the exact amount of each ingredient is added to the mix.

The HZS75 bucket type concrete mixing plant incorporates a central mixing unit, which can be a stationary drum mixer, a twin-shaft mixer, or a planetary mixer. These mixers employ advanced technology to thoroughly blend the ingredients, ensuring a homogenous mixture with optimal strength and durability.
