## Product Description

### High Efficiency 60m<sup>3</sup>/h Stationary Concrete Batching Plant Concrete Mixing Plant

The Bucket Type Concrete Batching Plant mainly consists of five major systems: mixer, material weighing system, material conveying system, material storage system, and control system, as well as other ancillary facilities. It is equipped with the necessary devices for storage, batching, conveying, stirring, control and other functions related to various raw materials required for precast concrete production. These raw materials include aggregates, powders, admixtures and water. The plant provides a complete set of equipment for supplying concrete in a concentrated manner rather than by using a mixer.
