**Capacity:** The HZS75 model is designed to handle a substantial volume of concrete production. With a capacity to produce 75 cubic meters of concrete per hour, it is well-suited for medium-sized construction projects that require a consistent supply of concrete.

**Precise Measurement:** The use of individual buckets for ingredient measurement ensures accurate proportions of cement, aggregate, water, and additives. This precise measurement system guarantees the production of high-quality concrete with consistent strength and durability.

**Customization:** The HZS75 plant can be easily customized to meet specific project requirements. It allows adjustments in the bucket capacity, ingredient quantities, and overall plant layout. This flexibility enables the plant to be tailored to the unique needs of medium-sized construction projects.
