Product Description

Bucket type Concrete Mixing Plant 50m³/h Concrete Batching Plant

A bucket type batching plant, also known as a bucket concrete plant, is a specialized type of concrete batching plant used in construction projects. It is designed to efficiently and accurately mix various ingredients to produce concrete in large quantities. The key feature of a bucket type batching plant is its use of individual buckets for measuring and transferring the ingredients. Each ingredient, such as cement, aggregate, water, and additives, is stored in separate buckets or containers. These buckets are equipped with a mechanism for precise measurement, typically using load cells or volumetric systems.
