Product Description

High Efficiency 75m³/h Stationary Concrete Batching Plant Concrete Mixing Plant

One of the key features of the HZS75 batching plant is its modular design, which allows for easy installation, transportation, and relocation. The plant consists of several modular units, including the mixing console, aggregate batching machine, cement silo, screw conveyor, and control system. This modular design makes it convenient to assemble and disassemble the plant, reducing setup time and enabling quick deployment to different job sites.

The HZS75 batching plant incorporates a twin-shaft concrete mixer, which ensures thorough mixing of aggregates, cement, water, and additives. The mixer operates at a high speed, promoting efficient mixing and homogeneity of the concrete mixture. It is equipped with wear-resistant liners to enhance its durability and minimize maintenance requirements.
