Product Description

dry mix concrete Batching Plant 2 Aggregate Hoppers, portable transit concrete mixing plant without mixer
High Efficiency 75m³/h Stationary Concrete Batching Plant Concrete Mixing Plant

To ensure accurate measurement and dosing of materials, the plant utilizes advanced weighing systems. These systems employ precision sensors and load cells to measure the exact quantities of aggregates, cement, water, and additives. The data from these measurements is then processed by a reliable control system, which automatically adjusts the mixing process to achieve the desired concrete specifications.

The HZS60 batching plant offers various options for material storage, including multiple cement silos with different capacities. This flexibility allows for the simultaneous production of different types of concrete and the ability to store an adequate amount of materials on-site, reducing downtime and improving workflow efficiency.
