Product Description

High Efficiency 60m³/h Stationary Concrete Batching Plant Concrete Mixing Plant

Belt conveyor concrete batching plant is designed to fulfill a variety of applications.

It is widely used on construction projects like roads, bridges, dam, airport, ports and any other projects.

The concrete batching plant is a concrete mixing equipment developed according to the actual needs of users who need frequent transitions, short construction period and long construction line. So it is the best choice for the project of multiple working sites with moderate concrete demand.

The capacity is customized from 25 - 270m³/h.
