Product Description

High Efficiency 60m³/h Stationary Concrete Batching Plant Concrete Mixing Plant

The Belt Conveyor Type Concrete Batching Plant primarily consists of five major systems: the mixer, material weighing system, material conveying system, material storage system, and control system, as well as other ancillary facilities. This plant is equipped with storage, batching, conveying, stirring, control, and other devices for various raw materials required for precast concrete production including aggregates, powders, admixtures, water etc. It provides a complete set of equipment for supplying concrete in a concentrated manner rather than by using a mixer.
