Product Description

Model ZAP-S120 Capacity 120TPH Batch Mix Asphalt Plant

The LB1500 asphalt plant offers several key advantages that differentiate it from other models in the market. These advantages include:

Optimal Production Capacity: The LB1500 model has a production capacity of 120 tons per hour, making it suitable for medium to large-scale asphalt production. It strikes a balance between high output and versatility, making it a preferred choice for various construction projects.

Efficient Mixing System: The LB1500 asphalt plant incorporates a twin-shaft paddle mixer, ensuring efficient and uniform mixing of aggregates, filler, and bitumen. This results in a high-quality asphalt mixture with excellent consistency and uniformity, which performs well on road surfaces.

Precise Measurement and Control: The LB1500 plant is equipped with advanced weighing systems that ensure accurate and precise dosing of aggregates, filler, and bitumen. The control system allows for adjustments in mixing ratios and temperature settings, providing flexibility to produce different asphalt mix designs while maintaining consistent quality.

4. Automatic/manual control system with failure self-diagnosis program, simple and safe.

5. Core components adopt international famous brand products, such as Siemens electrical components, EBICO burners, Switzerland METTLER TOLEDO weighing sensor, etc., reduces the failure rate and prolong its service life.
