

Fully Automatic Cement Concrete Batching Plant Ready Mix HZS 25-240m3/h Concrete Mixer With Twin Shaft 60

Our Product Introduction

for more products please visit us on sunnyconcretebatchingplant.com

Basic Information

- Place of Origin: Hunan
- Brand Name: SUNNY
- Model Number: HSZ100
- Minimum Order Quantity: 1 set
- Price: USD 110000-150000/ SET
- Packaging Details: container
- Delivery Time: 25-30 days
- Payment Terms: L/C, T/T, D/P, Western Union, MoneyGram
- Supply Ability: 20 Set/Sets per Month

Product Specification

- Material: Cement, Crushed Stone, Sands And So On
- Application: Building Works, Construction Projects, bridges, docks, airport
- Control System: Automatic PLC Control, totally Automatic
- Productivity: ≤60m3/h
- Mixer: JS2000 Twin-shaft Concrete Mixer
- Warranty: 12 Months
- Condition: New
- After-sales Service Provided: Engineers Available To Service Machinery Overseas, Online Support, Video Technical Support, Field Installation, commissioning And Training
- Highlight: **Twin Shaft Cement Concrete Batching Plant, Fully automatic Cement Concrete Batching Plant, Ready Mix Cement Concrete Batching Plant**

HZS25 Bucket Type Batching Plant

The HZS25 Bucket Type Batching Plant is a versatile and efficient piece of equipment designed for producing high-quality concrete. Ideal for small to medium-sized construction projects, this plant offers a compact footprint, easy operation, and reliable performance.

Key Features:

Bucket Feeding System: The plant utilizes a bucket system to feed aggregates and other materials into the weighing hoppers, ensuring precise and consistent batching.

Twin-Shaft Mixer: A high-efficiency twin-shaft mixer ensures thorough mixing of all ingredients, resulting in a homogeneous concrete mix with excellent properties.

Weighing System: Accurate weighing systems for aggregates, cement, water, and additives guarantee precise dosing and consistent concrete quality.

Control Panel: A user-friendly control panel provides easy operation and monitoring of the entire batching process.

Modular Design: The plant's modular design allows for easy installation and transportation, making it suitable for various site conditions.

Model	HZS35	HZS50	HZS75	HZS100
Production in Theory (m3/h)	35	50	75	100
Mixer Type	JS750	JS1000	JS1500	JS2000
Mixing Motor Power (KW)	2×15	2×18.5	2×30	2×37
Cycle time(S)	60	60	60	60
Mixer Discharging Volume(L)	750	1000	1500	2000
Maximum Particle Size of Aggregate(mm)	60	60	60	80
Batching Volume(L)	1200	1600	2400	3200
Aggregate Species	2-3	2-4	4	4
Aggregate lifting motor power(kw)	7.5	15	18.5	22
Discharging Height (m)	4	4	4	4
Installed Capacity(KW)	50	70	110	120

Features of concrete batching plant:

1. It adopts a combined structure and unitized module, which allows for quick and convenient installation and demolition.
2. The unloading angle of the aggregate bin has been increased to solve the problem of difficulties in unloading caused by rain.
3. The use of cylinder discharge or electric push rod makes it convenient and quick to discharge materials.
4. The overall steel structure of the mixing station is constructed with high-quality steel, providing strong structural strength and stability.
5. The mixing machine utilizes a twin-shaft forced mixing main machine, delivering strong mixing performance, uniformity, and high productivity.
6. Excellent pneumatic components, electrical components, etc., are employed to ensure equipment reliability and accurate

metering performance.

7. Each maintenance and repair site is equipped with a walking platform or check ladder, offering sufficient operation space for easy maintenance and repair.

8. Environmental protection measures include energy-saving features such as pulse dust removal system and recycling wastewater for reuse.
