Product Description

High Efficiency 60m³/h Stationary Concrete Batching Plant Concrete Mixing Plant High Efficiency 60m³/h Stationary Concrete Batching Plant Concrete Mixing Plant

A **Sunny Concrete Batching Plant** is a highly efficient and reliable system designed for the production of ready-mix concrete in large quantities. It combines various ingredients such as cement, water, aggregates (sand, gravel, or crushed stone), and additives to produce high-quality, consistent concrete for construction projects. The plant typically consists of several key components, including a cement silo, aggregate bins, a concrete mixer, a weigh batching system, and a control panel.

UPS, stable performance Siemens PLC, high speed and precision weighing unit module combined with our professional control and monitoring software;

Full automatic and easy operated production process of material measurement, transfer, mixing and discharging.

Heating system and ice plant could be adopted into this concrete plant in severely cold and hot environment.
