Product Description

Applications:

Commercial construction: Buildings, shopping malls, and office complexes

Infrastructure projects: Roads, bridges, tunnels, and dams

Precast concrete production: Blocks, slabs, and other prefabricated elements

Ready-mix concrete plants: Supplying concrete to various construction sites

Applications

The HZS50 bucket type batching plant is ideal for medium-sized construction projects, including residential buildings, commercial complexes, roads, and bridges. Its ability to produce high-quality concrete quickly and efficiently makes it a popular choice among construction professionals.

manner rather than by using a mixer.

High Production Capacity: With an output of 50 m³/h, it is capable of meeting the demands of large construction sites, such as bridges, roads, and high-rise buildings.

Modular Design: The plant features a modular design, which makes it easy to transport, install, and maintain.

Accurate Measurement System: The HZS50 uses electronic scales for weighing the aggregate, cement, water, and additives, ensuring precise batching and consistent concrete quality.

Efficient Mixing: It comes equipped with a twin-shaft mixer, which provides efficient and uniform mixing of concrete. This results in a high-quality end product with consistent strength and durability.
